

# **Test Summary Report - Redbus Website**

Project: Manual Testing - Redbus Website

Tester: Minal

Scope Covered:

Homepage Search and Validations  
Search Results and Filters  
Seat Selection and Fare Updates  
Passenger Details Form  
Payment Gateway Redirect  
Modify Search and Back Navigation  
Network Behaviour and No Internet Handling  
User Interface and Usability Review

Execution Summary:

Total Test Cases Executed: 15 plus

Passed: Majority of core flows and validation scenarios

Failed: None critical

Observations Logged: 2

Highlights:

Core booking journey works smoothly end to end.

Input validations work as expected for phone number and required fields.

Same day travel is supported and only upcoming buses are displayed.

The website handled refresh, navigation and network disconnect smoothly during testing.

Conclusion:

The Redbus website is functionally stable and provides a user friendly booking flow.

Negative and edge case testing also behaved correctly with proper user messages.

Only minor observations were recorded during testing.
